

## Fact Sheet

# OSTREA

## Red Clover (4n)

*Trifolium pratense* L.

Balanced performance in all features

### Things to know

Ostrea is a tetraploid "Mattenklee" variety which has good persistence and yield performance due to high resistance against Southern Anthracnose (*Colletotrichum trifolii*). The performance is slightly inferior in all traits compared to its sister variety Osmia. For this reason, Ostrea was not included directly in the Swiss list of recommended varieties, but was placed on the list of replacement varieties for the time being.

### Descent

#### Base material

Crossings of Eastern European ecotypes with breeding material from Agroscope treated with colchicine.

### M0 seed

Row trial 2008 (TP0855) with seed harvest from 27 families.
